Happy
Face Coins

It's fun and easy to give Happy Face Coins!

Giving Happy Face Coins can put a smile on your face as well as lighting up a smile on the face of someone you may not even know...

Panhandling is common, but many people today respond to panhandlers with feelings of anger, fear, resentment, frustration or helplessness.

You can change all of that by responding to panhandlers with love, by giving them a smile.

A smile may be all you need to give to feel better about yourself and those who survive on city streets by panhandling, but now you can give something more; you can give a gift that says you have been thinking about the needs of panhandlers or other poor people and that you have made a personal choice to care for them.

A gift of Happy Face Coins gives something to you when you give these gifts; giving happy face coins gives you an endorphin rush!

An endorphin rush can boost your immune system, ease your aches and pains, making you feel healthier, happier and more energetic!

The special gift of Happy Face Coins says something nice about you, it says you are a loving, compassionate, nurturing, human being who genuinely cares about their fellow humans!
